

United against Covid-19

Nearly 15 million medical masks on ship to the Libyan Ministry of Health.

It was a great moment last week at the deep-sea port of Guangzhou, China, when the last of nine 40-foot high-cube containers disappeared into the cargo hold. A few hours later, the ocean liner made its way to Tripoli. On board: 295,000 boxes containing nearly 15 million Class II surgical masks. AIRA Pharm, in cooperation with Noor Al-Amana, initiated, prepared and launched this trade in recent weeks. In addition to planning production, storage and transport, we also took care of the complete payment processing.

Arrival in Tripoli and onward transport to the Libyan Ministry of Health is expected in approximately three weeks. We would like to thank all companies and authorities involved for this great job!

The manufacturer's warehouse in Guangzhou.

On the way to the port.

We care.
